

What the model actually sees

One real example from each level — the model is given the very same instruction, and rating scale, a human received.

FORM

iconicity · does it sound like its meaning? scale 1–7

high “oomph” 6.9

low “how” 1.3

SYNTAX

naturalness · how natural is the sentence? scale 1–7

high “Who thought that John stole something?” 6.9

low “Who stood that Susan stole something?” 1.4

LEXICAL · AFFECTIVE

valence · positive or negative? scale 1–9

high “vacation” 8.5

low “murder” 1.5

LEXICAL · PERCEPTUAL / MOTOR

concreteness · abstract or concrete? scale 1–5

high “yo-yo” 5.0

low “belief” 1.2

LEXICAL · CONCEPTUAL

socialness · how social is its meaning? scale 1–7

high “friendship” 7.0

low “sulfur” 1.2

SENTENCE SEMANTICS

plausibility · does it make sense? scale 1–7

high “The operator stopped the machine.” 7.0

low “The mountain had been promptly delivered.” 1.3

EACH ITEM IS DROPPED INTO THE ORIGINAL HUMAN INSTRUCTION — UNCHANGED

“Please rate the word yo-yo on a scale from 1 (abstract) to 5 (concrete). Answer with one digit.”
